REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Independent claim 1 claims a roll assembly for a crop conditioner and independent claim 13 claims a roll used on a crop-conditioning machine. The roll includes a groove with a shape including at least two surfaces. One surface is perpendicular to the tangent of the peripheral surface the other surface tapers at an angle from the edge of the first surface closes to the axis of rotation. The intersection of the second surface and the peripheral surface forms a leading edge.

These limitations in combination with the remainder of the claims are not found in the prior art of record. Heath, 2,921,426, discloses a roll (Fig. 16) that has a rounded groove. O'Halloran et al. discloses a roll (Fig. 5) that has three surfaces. However, no of the surfaces are generally perpendicular to the tangent or have another surface that tapers upward from the first surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. From the image file wrapper of the case, it appears that the signed copy of the 1449 filed on 11/6/2003 might not have been mailed to the applicant. The examiner has signed the 1449 again and included another copy. If it is a duplicate please ignore.
